Academic Appointments

The University of Chicago

Associate (tenured) Professor (January 2024–present)

Department of the Geophysical Sciences

Committee on Computational and Applied Mathematics (CAAM)

Committee on Data Science

Data Science Institute (DSI)

PI: Climate Extremes Theory and Data (CeTD) Group

Faculty Director: AI for Climate Initiative (AICE), DSI and Institute for Climate and Sustainable Growth (ICSG)

Co-director: Human-centered Weather Forecasts Initiative (HCWF), ICSG

Rice University

Assistant and Associate (tenured) Professor (July 2016–December 2023)

Department of Mechanical Engineering and Department of Earth, Environmental & Planetary Sciences

Faculty Associate, Baker College (2017–2023)

Harvard University

Postdoctoral Fellow, Department of Earth and Planetary Sciences (2015–2016), *Mentor: Zhiming Kuang*

Ziff Environmental Fellow, Center for the Environment (2013–2015), *Hosts: Zhiming Kuang & Brian Farrell*

Woods Hole Oceanographic Institution (WHOI)

Geophysical Fluid Dynamics Program

PhD Student Fellow (summer 2012), *Supervisors: Charlie Doering & Greg Chini*

Staff Member (summers of 2014, 2017, 2018, 2022, 2023)

Education

University of California, Berkeley

PhD, Mechanical Engineering (2013)

Advisor: Phil Marcus

Thesis: *Baroclinic vortices in rotating stratified shearing flows: cyclones, anticyclones, and zombie vortices*

MA, Mathematics (2012)

Advisor: Jon Wilkening (based on work with Charlie Doering, University of Michigan)

Thesis: *Optimal transport from wall to wall*

University of Waterloo

MASc, Mechanical Engineering (2007)

Advisor: George Raithby

Thesis: *An efficient computational method for thermal radiation in participating media*

University of Tehran

BSc, Mechanical Engineering, Fluid Mechanics concentration (2005)

Honors & Awards

CAREER Award, National Science Foundation (NSF), Climate & Large-Scale Dynamics program, 2021

Young Investigator Award, Office of Naval Research (ONR), Applied & Computational Analysis program, 2020

Papers in Physical Review Letters (2x), GRL, JAMES (2x), AGU Advances, and Physical Review Fluids were selected for Editors' Highlights/Suggestions, 2014–2026

Papers in Nature Communications and GRL were featured in NSF Research News, 2019–2020

Papers in PNAS and J. Computational Physics were featured in SIAM News, 2023 & 2025

Early-Career Research Fellow, The National Academy of Sciences Gulf Research Program, 2018

Ziff Environmental Fellowship, Harvard University Center for the Environment, 2013–2015

Postdoctoral Award for Professional Development, Office of Postdoctoral Affairs, Harvard University, 2014

Geophysical Fluid Dynamics Fellowship, Woods Hole Oceanographic Institution, 2012

Postgraduate Scholarship, Natural Sciences & Engineering Research Council of Canada (NSERC), 2009–2011

Outstanding Preliminary Examination Award, ME Department, UC Berkeley, 2009

Jonathan Laitone Memorial Scholarship, ME Department, UC Berkeley, 2009

International Graduate Student Award, University of Waterloo, 2005–2007

Publications

Google Scholar: [link to profile](#).

* (†) indicates postdocs/grad (undergrad) students in my group. Only peer-reviewed journal papers and peer-reviewed conference papers (e.g., NeurIPS) are listed. Selected media coverage is given under each paper.

Highlighted Publications

Five key contributions across different disciplines:

- H1. Pathak J., Subramanian S., Harrington P., Raja S., Chattopadhyay* A., Mardani M., Kurth T., Hall D., Li Z., Azizzadenesheli K., [Hassanzadeh P.](#), Kashinath K. & Anandkumar A., FourCastNet: A global data-driven high-resolution weather model using adaptive Fourier neural operators, arXiv:2202.11214, 2022 ([link](#))
Coverage: [NVIDIA Newsroom](#), [Forbes](#), [SingularityHub](#)
- H2. [Hassanzadeh P.](#), Li* W., Sun* Y.Q., Wang* J., Wikner* A., Finkel* J. & Weare J., Missing the butterfly and predicting the past: Features or bugs of accurate AI weather models?, arXiv:2608.25835, 2026, *under review* ([pre-print](#))
- H3. Sun* Y.Q., [Hassanzadeh P.](#), Zand M., Chattopadhyay A., Weare J. & Abbot D.S., Can AI weather models predict out-of-distribution gray swan tropical cyclones?, *Proceedings of the National Academy of Sciences*, 122, 2025 ([link](#))
Coverage: [Nature \(news feature\)](#), [PNAS podcast](#), [Big Brains podcast](#), [SIAM News](#), [UChicago News](#), [Gizmodo](#), [El País](#)
- H4. Jakhar* K., Guan* Y. & [Hassanzadeh P.](#), Analytical and AI-discovered stable, accurate, and generalizable subgrid-scale closure for geophysical turbulence, *Physical Review Letters*, 136, 2026 ([link](#)) (Editors' Suggestion)
Coverage: [APS Physics](#), [UChicago News](#), [Phys.org](#)
- H5. Subel† A., Guan* Y., Chattopadhyay* A. & [Hassanzadeh P.](#), Explaining the physics of transfer learning in data-driven turbulence modeling, *PNAS Nexus*, 2, 2023 ([link](#))
Coverage: [IEEE Spectrum](#), [Rice News](#), [Psychology Today](#)

Peer-Reviewed Papers (Published & In Press)

70. Sun* Y.Q., [Hassanzadeh P.](#), Shaw T., Pahlavan* H.A. & Marchakitus[†] A., Predicting regional gray swans via translocation: AI weather models and Dubai's unprecedented 2024 rainfall, *Science Advances*, in press, 2026 ([pre-print](#))
Coverage: [Nature \(news feature\)](#), [SIAM News](#)
69. Lancelin* A., Wikner* A., Dubus L., Le Priol C., Abbot D.S., Bouchet F., [Hassanzadeh P.](#) & Weare J., AI-boosted rare event sampling to characterize extreme weather, *Physical Review Letters*, 137, 2026 ([link](#)) (Editors' Suggestion)
Coverage: [APS Physics](#), [Nature \(news\)](#), [Physics World](#), [UChicago News](#), [UChicago PSD](#), [Phys.org](#)
68. Jakhar* K., Guan* Y. & [Hassanzadeh P.](#), Analytical and AI-discovered stable, accurate, and generalizable subgrid-scale closure for geophysical turbulence, *Physical Review Letters*, 136, 2026 ([link](#)) (Editors' Suggestion)
Coverage: [APS Physics](#), [UChicago News](#), [Phys.org](#)
67. Guan* Y. & [Hassanzadeh P.](#), Semi-analytical eddy-viscosity and backscattering closures for 2D geophysical turbulence, *J. Fluid Mechanics*, in press, 2026 ([pre-print](#))
66. Rucker* K., Baxter I., [Hassanzadeh P.](#), Shaw T. & Pahlavan* H.A., Benchmarking regional thermodynamic trends in an AI emulator, ACE2, and a hybrid model, NeuralGCM, *Geophysical Research Letters*, 53, 2026 ([link](#))
65. Baxter I., Pahlavan* H.A., [Hassanzadeh P.](#), Rucker* K. & Shaw T., Benchmarking atmospheric circulation variability in an AI emulator, ACE2, and a hybrid model, NeuralGCM, *Geophysical Research Letters*, 53, 2026 ([link](#))
64. Guan* Y., [Hassanzadeh P.](#), Schneider T., Dunbar O., Huang D., Wu J. & Lopez-Gomez I., Online learning of eddy-viscosity and backscattering closures for geophysical turbulence using ensemble Kalman inversion, *Physical Review Research*, 8, 2026 ([link](#))
63. Guan* Y., Amoudruz L., Litvinov S., Jakhar* K., Moigani* R., Koumoutsakos P. & [Hassanzadeh P.](#), Prediction of extreme events in multiscale simulations of geophysical turbulence using reinforcement learning, *J. Computational Science*, in press, 2026 ([pre-print](#))
62. Shan W., Patel* D., Sun* Y.Q., [Hassanzadeh P.](#), Tziperman E. & Abbot D.S., Testing the limits of surface QG theory with deep learning, *J. Geophysical Research: Machine Learning and Computation*, 3, 2026 ([link](#))
61. Darman* M., [Hassanzadeh P.](#), Zanna L. & Chattopadhyay A., Fourier analysis of the physics of transfer learning for data-driven subgrid-scale models of ocean turbulence, *Machine Learning: Earth*, 2, 2026 ([link](#))
60. Nelli N., Francis D., Fonseca R., [Hassanzadeh P.](#) & Cherif C., The June 2024 Middle East compound heatwave: Dynamical drivers and AI-weather forecast models' evaluation, *Atmospheric Research*, 2026 ([link](#))

Oral Presentations

Upcoming: Harvard University, Earth & Planetary Sciences ClimaTea seminar (invited, 2026); University of Colorado Boulder, Applied Mathematics Distinguished Colloquium (invited, 2026); Boston College seminar (invited, 2026); University of Pittsburgh seminar (invited, 2027); SIAM Conference on Computational Science and Engineering (invited minisymposium talk, 2027)

2026: University of Oxford, Atmospheric, Oceanic and Planetary Physics seminar (invited); Max Planck Institute for Biogeochemistry, Jena (invited); Colloquium for the editors of the American Physical Society journals (invited; virtual); APS Global Physics Summit (March Meeting), Topical Group on Physics of Climate tutorial (invited tutorial); Discussion Meeting on Future Connections between Turbulence, Quantum Computing and Generative Machine Learning, Weimar (invited); University of Reading, VerAI Workshop on Verification of AI Weather Models (invited); SIAM Conference on Uncertainty Quantification (invited minisymposium talk); Gates Foundation Nimbus Program Convening (invited); Rossbypalooza Summer School, UChicago (invited lecture); SciFM26 Foundation Models and AI Agents for Science Conference, UChicago (panelist); SIAM Conference on Mathematics of Planet Earth; AMS Annual Meeting

2025: University of Cambridge, DAMTP seminar (invited); ETH Zürich, Institute for Atmospheric and Climate Science seminar (invited); Max Planck Institute for Meteorology, CELLO International Conference on Earth System Modeling (invited); Caltech-UChicago AI+Science Conference (invited); UK Met Office AI Seminar Series (invited; virtual); ECMWF Using ECMWF's Forecasts (UEF) meeting (invited); Brown University, SMARTIES seminar (invited; virtual); University of Illinois Urbana-Champaign, Climate, Meteorology & Atmospheric Sciences seminar (invited); University of Maryland, ESSIC seminar (invited; virtual); University of Maryland, Brin Mathematics Research Center workshop on Contemporary Issues and Future Opportunities in Applied Mathematics (invited); University of Lausanne, Expertise Center for Climate Extremes seminar (invited); IIT Bombay, Workshop on Data-Driven Methods for Weather, Climate, and Sustainability (invited); University of Leicester, workshop on Statistical Mechanics of the Climate System and of Ecosystems (invited lecture); SIAM Conference on Mathematical and Computational Issues in the Geosciences (invited minisymposium talk; virtual); AGU Fall Meeting (2 invited talks); AIM for Scale/Gates Foundation Weather Partnership Convening, Nairobi (invited); WMO Conference on AI for Weather Prediction, Abu Dhabi (panelist); SIAM Annual Meeting (minisymposium talk)

2024: Northwestern University, Engineering Sciences & Applied Mathematics seminar (invited); University of Notre Dame, Environmental Fluid Dynamics seminar (invited); University of Wisconsin-Madison, workshop on Advancing Fluid and Soft-Matter Dynamics with Machine Learning and Data Science (invited); Portland State University, Mathematics Colloquium and RTG seminar (2 talks; invited); SIAM Mathematics of Planet Earth Activity Group webinar (invited; virtual); University of Leeds, EPSRC NFFDy Summer Programme on Data-Driven Fluid Dynamics (3 invited lectures); University of Michigan, SciFM Summer School (invited lecture; virtual); UChicago AI+Science Summer School (invited lecture); Rossbypalooza Summer School, UChicago (invited lecture); UChicago, EPIC Lunch Series (invited); UChicago Research Computing Center, Mind Bytes symposium (invited); ICCS Cross-VESRI Meeting, University of Cambridge; US CLIVAR Atmospheric Blocking Workshop; SIAM Conference on Mathematics of Planet Earth (minisymposium talk); SIAM Conference on Uncertainty Quantification; AGU Fall Meeting; AMS Conference on Atmospheric & Oceanic Fluid Dynamics; APS March Meeting

2023: NYU Courant Institute, Center for Atmosphere Ocean Science colloquium (invited); NYU Courant Institute, Center for Data Science (invited); ENS Paris (invited); Georgia Tech, Earth & Atmospheric Sciences seminar (invited); UC Santa Barbara, Applied Mathematics seminar (invited); UChicago, Committee on Computational & Applied Mathematics colloquium (invited); UChicago, Department of the Geophysical Sciences seminar (invited); Google (invited); Southern Methodist University, Data Science Institute seminar (invited); University of New Hampshire (invited); PhilFest symposium in honor of Philip Marcus, UC Berkeley (invited); APS Topical Group on Physics of Climate seminar series (invited; virtual); ITU AI for Good series on AI and Climate Science (invited; virtual); WHOI Geophysical Fluid Dynamics Program (lecture); International Congress on Industrial & Applied Mathematics; SIAM Conference on Computational Science and Engineering; AGU Fall Meeting; AMS Annual Meeting; APS March Meeting; APS Division of Fluid Dynamics Meeting

2022: MIT, Program in Atmospheres, Oceans and Climate seminar (invited); Stanford University, Climate Dynamics seminar (invited); Columbia University, LEAP Center (invited); UC San Diego, Scripps Institution of Oceanography (invited); Johns Hopkins University, Center for Environmental & Applied Fluid Mechanics seminar (invited); Mathematisches Forschungsinstitut Oberwolfach workshop (invited); Penn State University, Applied Mathematics seminar (invited); UC Santa Cruz, Applied Mathematics seminar (invited); Carnegie Mellon University, AI for Super-Resolution Simulations Workshop (invited); US Naval Academy, Mathematics Department (invited); IMSI Workshop on Machine Learning for Climate and Weather Applications, UChicago

(invited); AMS (American Mathematical Society) Fall Western Sectional Meeting (invited); SIAM Conference on Mathematics of Planet Earth (invited); San Francisco State University, Physics & Astronomy colloquium (invited; virtual); Rice SSPEED Center conference (invited); WHOI Geophysical Fluid Dynamics Program (lecture); WCRP Model Hierarchies Workshop, Stanford University; SIAM Conference on Mathematics of Data Science (2 minisymposium talks); SIAM Texas-Louisiana Section Meeting; AGU Fall Meeting (2 talks); Ocean Sciences Meeting (virtual); AMS Annual Meeting (virtual); AMS Conference on Atmospheric & Oceanic Fluid Dynamics; APS March Meeting; APS Division of Fluid Dynamics Meeting

2021: Caltech, CliMA seminar (invited); Caltech, CliMA seminar (invited; virtual); Yale University, Atmosphere, Ocean & Climate Dynamics seminar (invited; virtual); KITP Program on Machine Learning for Climate Physics, UC Santa Barbara (invited); NVIDIA (invited; virtual); Goethe University Frankfurt, Theory of Atmospheric Dynamics & Climate seminar (invited; virtual); AGU Fall Meeting (invited; virtual); SIAM Annual Meeting (invited; virtual); US National Congress on Computational Mechanics (invited; virtual); Workshop on Knowledge Guided Machine Learning (invited; virtual); IS-ENES₃/ESiWACE₂ Machine Learning Workshop (invited; virtual); Charlie Doering GFD Appreciation Symposium (invited; virtual); SIAM Conference on Applications of Dynamical Systems (virtual); Atmospheric Blocking Workshop (virtual); AMS Annual Meeting (virtual); APS Division of Fluid Dynamics Meeting

2020: Stanford University, Climate Dynamics seminar (invited; virtual); Columbia University, Machine Learning in Science & Engineering Conference (invited; virtual); NYU Courant Institute, Atmosphere Ocean Science colloquium (invited; virtual); University of Washington, Atmospheric Sciences colloquium (invited; virtual); Purdue University, Earth, Atmospheric & Planetary Sciences seminar (invited); UC Irvine, Earth System Science seminar (invited; virtual); UC Davis, Atmospheric Science seminar (invited; virtual); NRL/ONR Data Assimilation Workshop (invited; virtual); Mitsubishi Electric Research Laboratories (invited); University of Houston, Civil & Environmental Engineering seminar (invited); University of Texas at El Paso, Mechanical Engineering seminar (invited; virtual); Rice University, Scientia Institute (invited; virtual); Rice Ken Kennedy Institute HPC Conference (invited); AGU Fall Meeting (invited; virtual); SIAM Conference on Mathematics of Planet Earth (invited; virtual); AGU Fall Meeting (contributed; virtual); AMS Annual Meeting (2 talks); EGU General Assembly (virtual); APS Division of Fluid Dynamics Meeting (virtual)

2010–2019: Harvard University Center for the Environment (invited); MIT, MASS seminar (invited); Stanford University, Climate Dynamics seminar (invited); Caltech (invited); Columbia University, SEAS Colloquium in Climate Science (invited); UC Berkeley, Earth & Planetary Science colloquium (invited); UC Berkeley, Fluids seminar (invited); UCLA, Atmospheric & Oceanic Sciences seminar (invited); University of Oxford, Palmer group seminar (invited); Colorado State University, Atmospheric Science colloquium (invited); Texas A&M University, Atmospheric Sciences seminar (invited); IUTAM Workshop on Stochastic Approaches to Transitions in Fluid Flows, Cornell University (invited); International Congress on Industrial & Applied Mathematics (invited); SIAM Conference on Mathematics of Planet Earth (invited); SIAM Conference on Applications of Dynamical Systems (invited); SIAM Conference on Uncertainty Quantification (invited); US Naval Academy, Mathematics Department (2 talks; invited); University of Houston, Mathematics Department (invited); University of Houston, Mechanical Engineering seminar (invited); Rice University, Computational & Applied Mathematics seminar (invited); Rice University, Earth Science seminar (invited); Rice University, Mechanical Engineering seminar (invited); Rice Ken Kennedy Institute (invited); Rice SSPEED Center conference (invited); Rice SSPEED Center Harvey Conference (invited); University of Oxford, Machine Learning for Weather and Climate Workshop; University of Reading, Workshop on Atmospheric Blocking; UCLA, Workshop on Connecting Theory to Experiments in Geophysical & Astrophysical Fluid Dynamics; NCAR IMAGE Theme-of-the-Year Turbulence workshop; WHOI Geophysical Fluid Dynamics Program; Texas Systems Day, Texas A&M University; AGU Fall Meeting; AMS Annual Meeting; AMS Conference on Atmospheric & Oceanic Fluid Dynamics; APS March Meeting; APS Division of Fluid Dynamics Meeting

Advising & Mentoring

Postdoctoral Fellows and Research Scientists

Current: Dr. Katie Kowal (Research Scientist and Director of AI Weather), Dr. Bing Gong (Research Scientist), Dr. Alex Wikner (Schmidt AI in Science Postdoctoral Fellow), Dr. Justin Finkel (AICE-DSI Postdoctoral Fellow), Dr. Jess Wan (CSEi Postdoctoral Fellow), Dr. Jhayron S. Pérez-Carrasquilla (AICE-DSI Postdoctoral Scholar), Dr. Rajat Masiwal, Dr. Lualawi Mareshet Admasu

Dr. Y. Qiang Sun (2022–2026): Associate Professor of Atmospheric Sciences, Nanjing University

Dr. Yifei Guan (2020–2024): Assistant Professor of Mechanical Engineering, Union College

Dr. Lei Wang (2017–2018; joint with Zhiming Kuang, Harvard): Assistant Professor of Earth, Environmental & Planetary Sciences, Purdue University

Dr. Dhruvit Patel (NSF Postdoctoral Fellow, 2024–2025): Founding Research Scientist at Silurian AI

Dr. Rambod Mojgani (2021–2024): ML Research Engineer at RTX

Dr. Cedric Gillmann (2021–2023): Senior Researcher at ETH Zürich

Dr. Maxime Maurice (2021–2023): Scientist at LMD, IPSL

Dr. Sandro Lubis (2019–2022): Research Scientist at Pacific Northwest National Laboratory

Dr. Amin Khodkar (2017–2019): Postdoc at UCLA

PhD Students

Current: Anna Asch (CAAM), Tina Wang (CAAM), Katy Rucker (co-advised with Tiffany Shaw), Weidong Li, Zhixing Liu (co-advised with Dorian Abbot)

Dr. Ashesh Chattopadhyay (2017–2022): Assistant Professor of Applied Mathematics, UC Santa Cruz

Dr. Karan Jakhar (2021–2025): AI+Weather Research Scientist at Pravah

Dr. Ebrahim Nabizadeh (2017–2022): ML Scientist at Verisk

Master's and Undergraduate Students

Current: Daniel Boscu

Lichuan Xu (MS, 2024–2026)

Willow Stenglein (summer 2025): undergraduate at UT Austin

Adam Marchakitus (undergraduate researcher, 2024–2025): Research Staff, UChicago AI for Climate Initiative

Moein Darman (MS, 2022–2024): PhD student at UC Santa Cruz

Adam Subel (undergraduate researcher, 2018–2021; NSF GRFP recipient and Rice Distinguished Research Excellence Award): PhD student at NYU Courant Institute

David Lee (MS, 2018–2020; supported by US Air Force): Pilot, US Air Force

Joey Lou (undergraduate researcher, 2018–2019): Graduate student at UC Berkeley

Sebastian Jia (undergraduate researcher, summer 2017): Graduate student at the University of Pennsylvania

Service

Editorial Boards

Associate Editor, Science Advances (AAAS), 2026–present

Associate Editor, Journal of Advances in Modeling Earth Systems (AGU), 2022–2026

Co-editor, Weather and Climate Dynamics (EGU), 2020–2026

Editorial Board, Environmental Research: Climate (IOP)

Professional Societies

Chair, Society for Industrial and Applied Mathematics (SIAM) Activity Group on Mathematics of Planet Earth (MPE), 2025–present

Member-at-Large, American Physical Society (APS) Topical Group on the Physics of Climate (GPC), 2025–2026

Founding chair, APS-GPC Seminar Series Committee, 2021–2023

Member, Nominations Committee, APS-GPC, 2025

Honors Selection Committee, APS-GPC, 2022–2023

Advisory Boards & Panels

Member, Joint Advisory Group on Artificial Intelligence (JAG-AI), World Meteorological Organization (WMO), 2025–present

Member, Steering Committee, UCAR/CPAESS Climate and Global Change Postdoctoral Fellowship Program, 2026–2029

Member, Weather Forecasts for Farmers Technical Panel, Agriculture Innovation Mechanism (AIM) for Scale (a Gates Foundation-UAE initiative), 2024–present

Member, NVIDIA Advisory Council on Physics-ML for Climate Science, 2024–2026

Conference, Workshop & Session Organization

Member, Organizing Committee, UChicago-Caltech AI+Science Conference, Chicago (2026)

Co-organizer, IMSI workshop *Unpacking AI Weather Emulators: What and How Do They Learn?*, UChicago (2026)

Co-organizer, UChicago Workshop on AI Weather Forecasting for Developing Economies, Data Science Institute (2026)

Organizer, AI for Climate Initiative Speaker Series, UChicago (2025–present)

Co-organizer, *Statistical Mechanics of the Climate System and of Ecosystems* workshop (StatPhys29 satellite), University of Leicester (2025)

Co-organizer, *AI Weather Forecasting Training Program* for meteorological and agriculture agencies of low- and middle-income countries, HCWF (2025–present)

Organizer, APS-GPC monthly *Virtual Seminar Series on Climate Physics* (2022–2023)

Mini-symposium organizer: *SIAM Mathematics of Data Science Conference* (2022); *SIAM Mathematics of Planet Earth Conference* (2022)

Session organizer: *AGU Fall Meeting* (2017–2021); *AMS Annual Meeting* (2022, 2 sessions); *US National Congress on Computational Mechanics* (2021); *AGU Fall Meeting* (2018); *APS-DFD Annual Meeting* focus session (2018)

Session chair: *WCRP Model Hierarchies Workshop*, Stanford (2022); *AI Super-Resolution Simulations Workshop*, CMU (2022); *KITP Machine Learning and the Physics of Climate* workshop (2021); *APS-DFD Annual Meeting* (2013, 2018, 2022); *Modeling Hierarchies Workshop*, Princeton (2016); *AMS-AOFD Meeting* (2015)

Other

External reviewer for tenure and promotion cases (2025, 2026)

*University Service***The University of Chicago (2024–present)**

Member, Executive Steering Committee, joint ICSG-DSI Program on Climate and AI, 2026–present

Member, Faculty Advisory Board for Computing and IT, Physical Sciences Division, 2026–present

Core Faculty, Climate Systems Engineering initiative (CSEi), 2025–present

Chair, Postdoc Advising Committee, Department of the Geophysical Sciences, 2026–present

Member, Curriculum Committee, Department of the Geophysical Sciences, 2026–present

Member, Colloquia Committee, Department of the Geophysical Sciences, 2025–2026

Chair, Graduate Application Screening Committee, Department of the Geophysical Sciences, 2025–2026

Member, UChicago Working Group for Sub-Saharan Africa, 2025–present

Member, Postdoctoral Scholars Search Committee, DSI, 2024

Rice University (2016–2023)

Steering committee, Gulf Scholars Program (2021–2023)

Faculty search committees: Earth, Environmental & Planetary Sciences (2021–2022); Civil & Environmental Engineering (2018, 2019)

School of Engineering Strategic Planning committee (2017–2018); Marshals committee (2017–2019, 2021)

Mechanical Engineering: Chair, Seminar Series committee (2021–2023); Awards committee (2021–2023); Co-chair, Seminar Series committee (2018–2020); Graduate Studies committee (2016–2021)

Keynote, Gulf Coast Undergraduate Research Symposium (2016); Judge, Rice Undergraduate Research Symposium (2016–2018, 2020)

Teaching

GEOS 35450/25450: Foundations of AI for Geosciences (Fall 2026)

GEOS 35500/25500 and DS 35510: Scientific Machine Learning for Climate and Chaos (Spring 2025, 2026)

MECH 575: Introduction to Hydrodynamic Stability (Spring 2017, 2018, 2019, 2020, 2022)

MECH 611/612: Independent Study on Geophysical Fluid Dynamics (Spring & Fall 2018)

GEOS 13300: Atmosphere (Fall 2025)

MECH 371: Fluid Mechanics (Fall 2017, 2018, 2019, 2020, 2021)

Summer Schools & Short Courses

UChicago AI+Science Summer School (2024)

University of Leeds EPSRC NFFDy Summer Programme (2024)
